```python
from selenium.webdriver.common.by import By

from pages.base_page import BasePage

text_loc = (By.XPATH, "//h1[contains(text(),'My account - Customer info')]")

class MyAccountPage(BasePage):

    def __init__(self, driver, wait):

        super().__init__(driver, wait)

    def display_warning_bar(self):

        return self.get_text(text_loc)
```
